January 21, 2014

As President of Beck Property Co., I have had the unique opportunity to work with numerous projects, contractors and project managers over the course of several years. Our business includes commercial real estate brokerage, property management and development. Work in these areas has provided me with exceptional insight regarding developing real estate as well as representation of developers, tenants and landlords. This said, I have a very good feel for Heath Kelly's ability to perform as a general contractor.

We have used Williams-Brown Inc. as our general contractor for many projects, of which Heath Kelly was project manager. One such managed project for us was "Shops of East Hill", which was awarded Commercial Development of the Year for 2008. Heath has consistently exemplified exceptional leadership qualities in regards to organizational ability, communication, and attention to detail. His integrity was unquestionable as he was always very upfront and constantly communicated possible schedule and budgetary changes by being proactive during the entire construction process. This communication ensured quality company/client relations in regard to move in timelines and coordination.

Heath Kelly Construction is a relatively new company; however, Heath Kelly has many years of being involved in successful construction projects. He has an outstanding reputation within the industry, and I believe he will work exceedingly hard to put his clients first and follow through on all promises. I look forward to Heath Kelly Construction becoming a prominent builder in the near future for Pensacola and the surrounding area.

Please feel free to contact me for further information if needed with regard to Heath Kelly's qualifications as a general contractor.

Thank you,

Justin A. Beck, CCIM, CPM
President
