Subject: Letter of Recommendation: Heath Kelly Construction

To whom it may concern,

As a professional engineer in the Pensacola area, I've worked with dozens of contractors over my career. Being a designer, it is common for me to be the first stop for a homeowner wanting to build an addition, renovate their home, or build a new home. When these homeowners walk in, occasionally they don't have a contractor and are looking for recommendations. This is a pivotal time for me to be sure I recommend the correct fit; someone who is going to maintain the high level of service and integrity that I maintain with my clients since the contractors work is a reflection on my company and myself. Throughout my career, I've strived to recommend contractors who I believe hold these same values.

I first worked with Heath Kelly Construction in July of 2017. He was the contractor on a piling house repair job for which I was the professional engineer. I'm always tentative meeting and working with new contractors as I've seen the entire spectrum from the "turn-and-burn" contractors to high quality workmanship. During this first project I immediately realized the professionalism and integrity of Heath Kelly Construction when I was called out to the job to determine an alternate repair method when the as-built conditions were not standard and were contrary to the engineered drawings.

Since that project, we have worked on dozens of project together ranging from small residential project to large commercial projects. If I ever have a question or concern, he's just a phone call away. If there's ever a problem on a job, Heath is the one that shows up to address it. He's the face of the company and maintains a good working relationship with all of his clients no matter the cost.

If you are looking for a contractor with integrity who provides quality construction and stays involved personally in every project, Heath Kelly Construction is a must call. I recommend Heath Kelly Construction to my clients because I know the outcome: **A Satisfied Client.**

If you would like more information or to discuss Heath Kelly Construction, please feel free to call.

Sincerely,

J. Christian Voelkel, PE
